

SMART PAD BASIC 50MM

Specs

Made in the USA
Long Lifespan - Remains in place 2 to 3 turf life cycles
Resistant to mold and chemicals
Successfully tested to comply with CA Prop 65
Qualifies for LEED Credits

Features

Smart Pad Basic™ panels provide superior drainage and impact absorption necessary for safe outdoor and indoor play areas. Our Smart Pad Basic™ is available in 50mm thickness, eliminating the use of an expensive aggregate layer. Smart Pad Basic Play Products are made from 100% recycled materials, which help you obtain LEED® Credit for your projects.

Advantages:

- Outstanding impact protection and energy absorption
- Key factor preventing injuries due to falls on playgrounds
- Independently safety tested
- Exceeds ASTM F1292 guidelines to absorb impact
- Non-toxic and environmentally friendly
- Superior drainage rate
- Long lifespan and stability
