

WEED BARRIER CLOTH

Specs

600' x 300' roll of non-woven polypropylene fabric

UV protected fabric allows air and water to reach plant roots while stopping weeds

8 year warranty

Features

- Weed Barrier cloth is a spun bond polypropylene fabric that has a hydrophilic treatment which allows more air and water to pass through thus preventing sunlight and nutrients from reaching the places weeds tend to grow.
- Minimizes light penetration - suppresses weed growth and prevents weed-seed germination
- Safe and easy to install
- Suitable for use in flower beds, under walkways, greenhouses, under decks, under artificial turf and much more
- Comes in a 6'x 300' Roll
