

Artificial Grass Accessory

SMART PAD ADVANCED 50MM

Specs

ALL OF SMART PAD BASIC FEATURES PLUS+

Patented lightweight interlocking panel system, easy to handle and fast to install

Computer monitored molding manufacturing process guarantees dimensional & density consistency

Thermal insulation & drainage layers that can be installed over permeable/impermeable bases, eliminating cost of frost heave

100% Recyclable. Carries the coveted Cradle to Cradle Certification

Features

Known as the world's most technologically advanced safety base system for play areas, the Smart Pad Advanced is manufactured with the highest quality expanded polypropylene; well known for its longevity and environmental safety.

With shock-absorbing pistons and its overlapping joint design, the Smart Pad Advanced provides a high degree of safety throughout the play surface and is engineered to perform in all climatic conditions
