

MAPEI ULTRA BOND REPAIR ADHESIVE

Specs

29oz tube; great for small repair projects

Recommended use with Mapei tape

Fast setting time

Excellent handling characteristics and superior strength

Light Color

Meets FIFA standards

Features

Ultrabond 527 is a moisture-curing, one-component, polyurethane adhesive specifically designed for the repair of existing outdoor turf in high-performance sports installations. It can be used in both interior and exterior applications, and has excellent weather resistance. A light misting of water will speed up the cure time, allowing for quick repairs.
